

Burcu Payidarol

Head of Product Design | Design Systems, AI & Product Experience

Portfolio: <https://www.burcupayidarol.com/> | LinkedIn: <https://www.linkedin.com/in/burcupayidarol/payidarol.burcu@gmail.com> | 862 290 7699

Head of Product Design - (Neurocycle)

Remote | January 2024 - Present

- Own and evolve a cross-platform design system across iOS, Android, and responsive web, defining typography, color, layout, reusable components, design patterns, and visual standards to maintain product consistency.
- Integrate AI-assisted design and development workflows with the design system, leveraging reusable components, structured specifications, and established design rules to accelerate UI creation and maintain consistency across platforms.
- Lead and mentor product designers, providing design direction, constructive feedback, and ongoing coaching to strengthen design quality, support professional growth, and align execution with product strategy.
- Analyze 1,000+ user surveys and behavioral data to identify onboarding friction and free-trial confusion, translating research insights into targeted product improvements.
- Lead the end-to-end redesign of the five-step program, daily experiences, branding, and onboarding, creating a more cohesive, engaging, and accessible product experience.
- Deliver measurable product improvements: reduce user errors by 40%, increase retention by 22%, improve App Store ratings from 3.2 to 4.0, and improve Google Play ratings from 3.0 to 3.8.
- Streamline product, design, and engineering workflows through reusable design patterns, clearer specifications, and AI-assisted processes, reducing time-to-market by 35%.

Founder, Product Designer Engineer - (Multiverse Design Studio)

Remote | June 2023 - Present

- Establish scalable design systems for live digital products, defining reusable components, typography, color, spacing, layout patterns, and page-level structures as a consistent source of truth for implementation.
- Leverage AI-assisted development to translate structured design specifications and design-system rules into production-ready web interfaces, improving consistency between design and implementation.
- Design and develop operational tools that connect digital experiences with business workflows, including a website-integrated POS, catering and client-management workflows, and an AI-powered social publishing system.
- Build automated client communication workflows for order and event management, improving consistency across customer touchpoints.
- Bridge product design and development by using AI to rapidly prototype, iterate, and ship live digital experiences.

UX/UI Designer - Contract Designer (Despark)

Remote | April 2023 - December 2023

- Design end-to-end workflows for a B2B/B2C SaaS research platform, including mission discovery, interviews, scheduling, user profiles, and participant incentives.
- Establish reusable component patterns and a consistent visual system to support scalable product development and accessible desktop experiences aligned with WCAG 2.2.
- Simplify mission participation and interview scheduling, increasing task completion by 20%, reducing scheduling errors by 20%, and improving productivity by 30%.

- Design a guided profile-completion experience that doubles profile actions and helps users qualify for more research opportunities.
- Collaborate with product and engineering teams to translate interaction patterns, components, and states into consistent production experiences.

UX/UI Designer - Contract Designer (Splyt)

Remote | April 2022 - April 2023

- Co-lead the MVP redesign of a peer-to-peer bill-splitting platform, collaborating with designers, engineers, and stakeholders to translate research into improved product workflows.
- Conduct surveys and interviews, with outreach to 6,000 people in NYC and more than 30,000 nationwide, to inform product decisions.
- Redesign receipt-review interactions by displaying original receipts alongside scanned line items, improving receipt accuracy by 25% through fewer corrections.
- Simplify payment and moderator workflows, enabling users to pay without waiting for every participant to be assigned and reducing support requests by 30%.
- Define the product design system and component specifications, documenting interaction behavior, responsive behavior, and UI states to improve consistency between design and engineering implementation.

Technical Specialist - Apple

Edison, NJ | November 2019 - April 2022

- Conduct usability assessments of Apple products and services, identifying experience breakdowns and recommending improvements.
- Collaborate with cross-functional teams to resolve technical issues and improve product usability and customer experiences.

EDUCATION

Rutgers University: Bachelor's Degree · Information Technology and Informatics (ITI) and Psychology

SKILLS

Design Leadership: Product design leadership · Design strategy · Design direction · Designer mentorship · Design critique · Cross-functional leadership · Stakeholder management · Team collaboration · Design operations · Design quality standards · Product thinking

Research & Strategy: User research · User interviews · Surveys · Usability testing · Behavioral analysis · Qualitative research · Quantitative analysis · Competitive analysis · User personas · Journey mapping · Problem framing · Design strategy · Product discovery · Data-informed design

Design Systems: Design system architecture · Design tokens · Component libraries · UI patterns · Typography systems · Color systems · Spacing systems · Layout systems · Responsive design · Component states · Interaction patterns · Design documentation · Design governance · Cross-platform systems · System scalability

Toolkit: Figma · FigJam · AI development tools · Github · Visual Studio Code · Adobe Creative Cloud · Notion · Excel · R Studio

Soft Skills: Leadership · Strategic Thinking · Change Management · Mentorship · Coaching · Stakeholder Management · Client Management · Cross-Functional Communication · Product-Design-Engineering Collaboration · Facilitation · Presentation · Storytelling · Design Critique · Critical Thinking · Problem-Solving · Adaptability · Curiosity · Empathy · Attention to Detail · Agile Mindset · Scrum · Design Thinking · User-Centered Design · Ethical Design
